

Rebuild. Recover. Secure. Instantly.

Solving the Toughest Endpoint Challenges — Automatically

Stop wasting time on manual rebuilds, compliance checks, and remote recovery. Swimage automates it all.

Swimage is a software platform that automates the full PC lifecycle—spanning OS imaging, security, backups, migrations, recovery, and more—with enterprise-grade orchestration.

How Swimage Automates Endpoint Management

1

Detect

Policy-Triggered
Rebuilds & Events

2

Decide

AI-Driven Workflows
Apply Correct
Automation

3

Deploy

Rebuild OS, Restore
Apps & Enforce
Security — All in
Minutes
